### **MBCH Seminar Series Speaker: Dr. Hameeda Sultana: 4:00pm**

TODAY 4pm, Forbes 1022

Dr. Hameeda Sultana from ODU will be presenting at the MBCH seminar: "Semaphorins as potential therapeutics against vector-borne diseases"

Abstract

Semaphorins are a large family of phylogenetically conserved soluble and membrane bound proteins that functions in linking the immune and nervous system. My previous work has shown that semaphorin7A abrogation protects mice from lethal West Nile virus (WNV) infection. Sema7A antibody blocking was therapeutic against WNV pathogenesis and mortality. In this talk, I will shed some insights on the role of Semaphorins in vector borne diseases. My future direction is to combat the arthropod-borne diseases with semaphorins as potential candidates for drug discovery, therapeutics and vaccine development.
