Subject: courses for approval

Dear Pete,

Here are the courses I mentioned in the memo to Tracey. The UCC approved them today.

- [MLAN 223](#) (new course) - pending revision of the catalog description to make it more general - this description is specifically tailored to this topic - we will probably use an edited version of the "generic" 223 description that exists on the UCC website
- [CLST 223](#) (new course)
- [SPAN 312](#), [SPAN 351](#), and [SPAN 352](#) (existing courses that were approved for the Global and Multicultural AoI)
- [PSYC 201](#) (existing course that was approved for the Investigating the Natural World AoI; we also approved a title change to "Investigating the Biological Bases of Behavior and Cognition")
- [PSYC 451](#) (new course at the undergraduate level - it was taught at the graduate level before - AND as a part of the Formal and Informal Reasoning AoI) - Please note there are two documents for this course; one contains the AoI proposal and one contains the UCC new course proposal

Hope this isn't too confusing.

Best,

Laura
