

Dear Rebecca:

A team of faculty and I attended a SENCER (Science Education for New Civic Engagements) summer institute in August. On January 31, the team will offer a workshop to help faculty (all faculty, not just science faculty) SENCERize courses or undergraduate research. The team was wondering if the Senate would be willing to set aside 2 or 3 faculty development grants for summer for faculty to work on this. It is tied closely to service learning.

Please let me know if the Senate will agree to this and we can announce it at the workshop on the 31st (if we know by then).

Thank you for considering this.

Bobbye
